UNIVERSITÄT
WIEN

Mission and Development Strategy of TU Wien

TU Wien, September 23th, 2022

Sabine Seidler, Rector

TU Wien – From Basic Research to Application

- 1815 Founded as „k.k. polytechnisches Institut“
- 1902 Promotion Right
- 1919 Admission of Women
- 1975 University of Technology/TU Wien

TU Wien: The Big Picture in Figures (2021)

Students by Discipline (Academic Year 2020/21)

**Architecture and
Spatial Planning**

Natural Sciences

f Female Students
m Male Students

KNOWLEGDE BALANCE 2021

Source of Grants and Funding (2021)

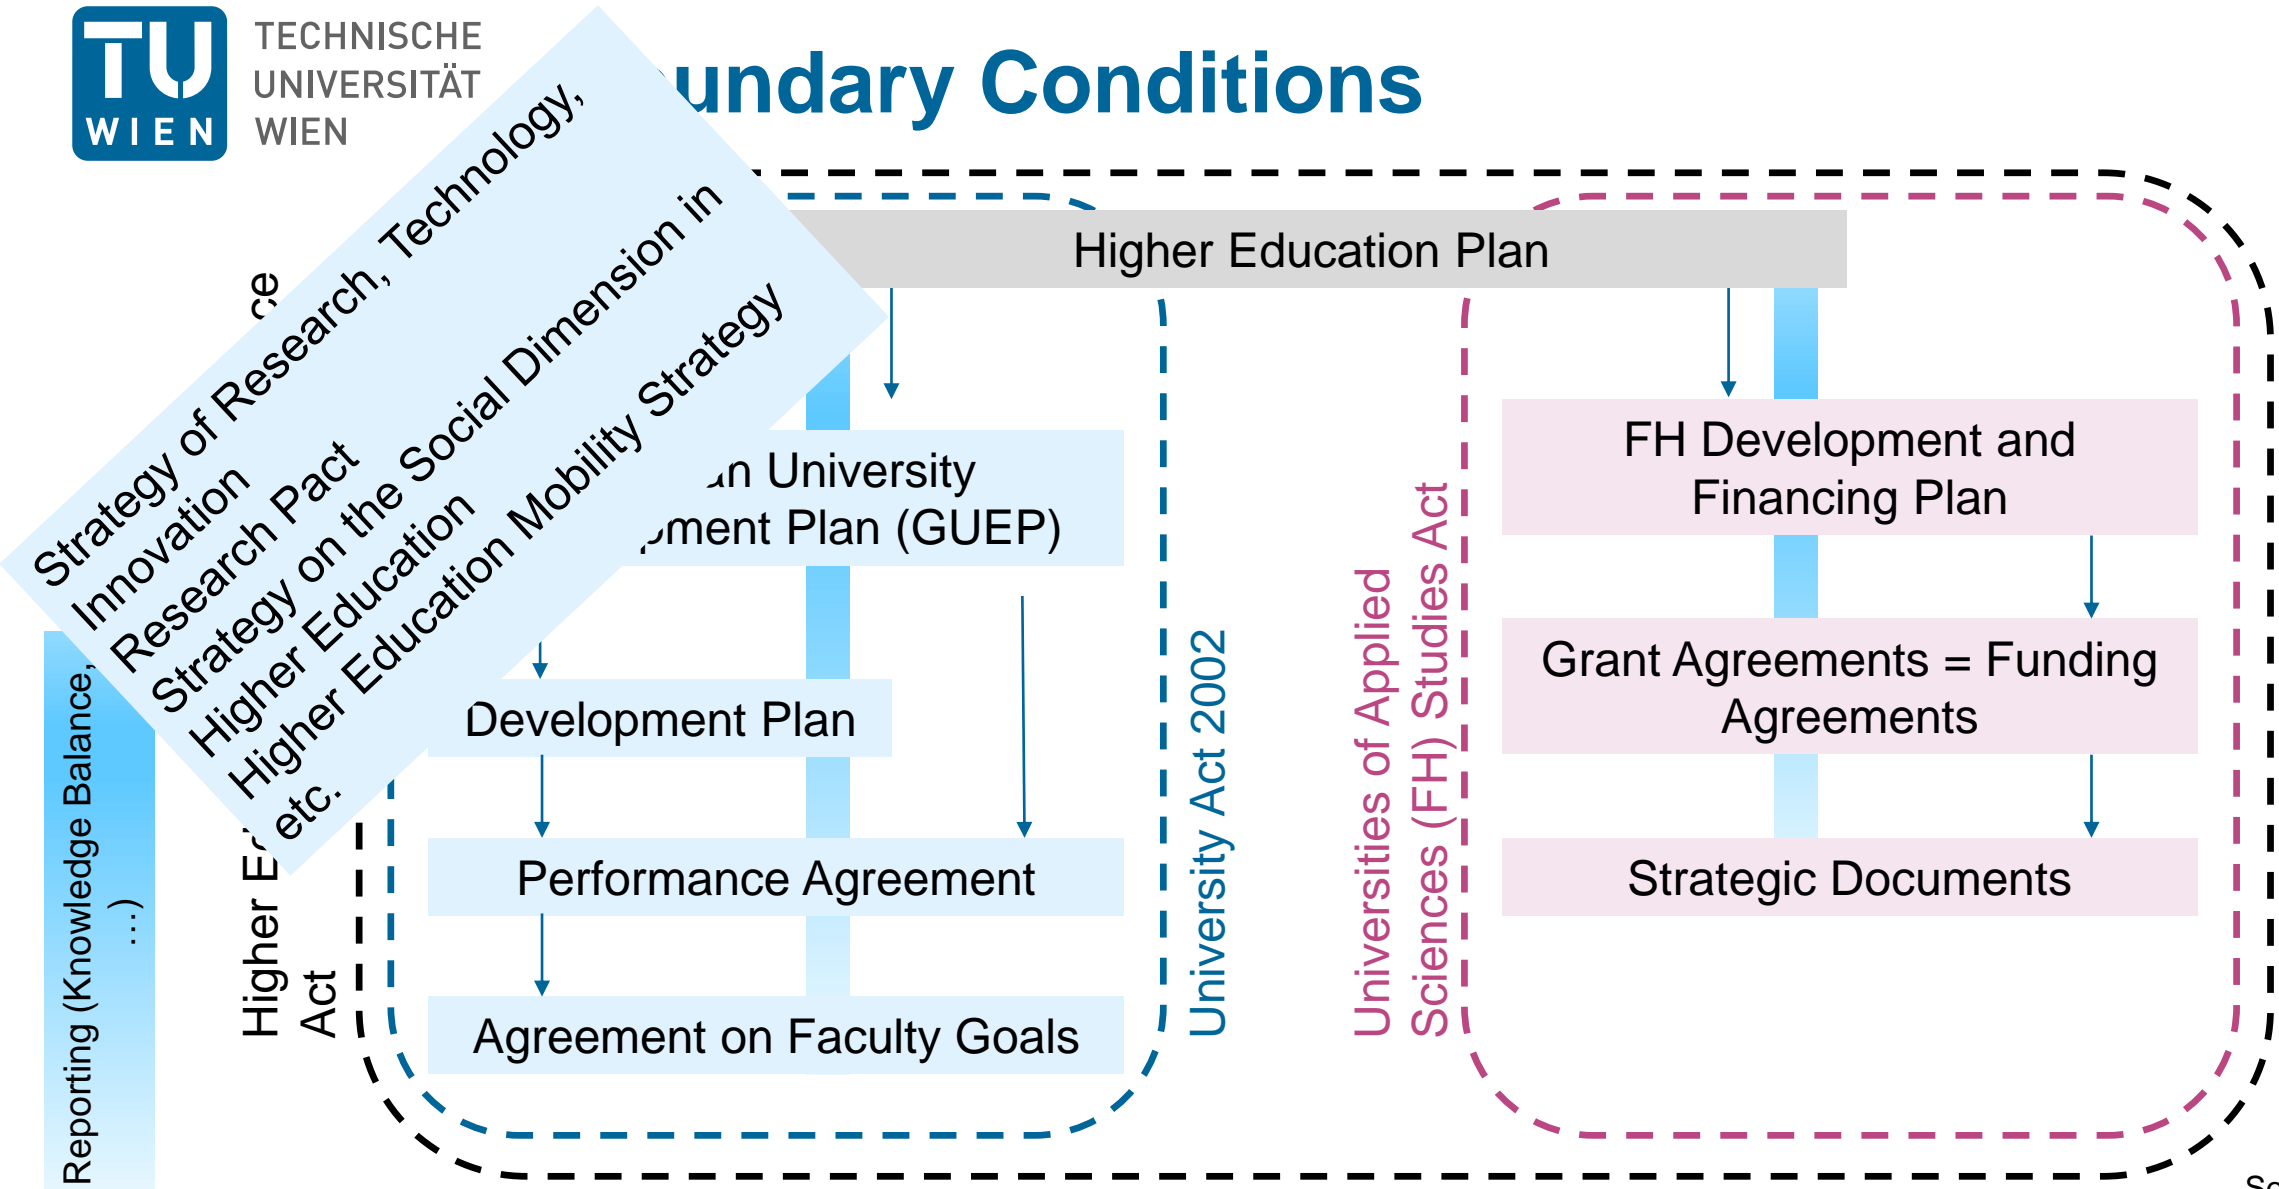

Global Budget 304 Mio €

Project Budget 91 Mio €

} 395
Mio €

What ist TU Wien for?

Technology for People: Developing Scientific Excellence and Imparting Comprehensive Competence

- Action Fields
 - Society
 - Research
 - Teaching
 - Maintaining and Developing Resources

Action Field „Society“

- transfer of knowledge and innovation
 - measures, goals
- lifelong learning
 - measures, goals
- training of young scientists and artists
 - measures, goals
- promotion of gender equality and diversity
 - measures, goals
- digital transformation
 - Center for Technology and Society
 - ...
- opening up of philanthropic resources
 - measures, goals

Center for Technology and Society (CTS)

Encourage inter-and transdisciplinary cooperation

- inter-university and inter-faculty cooperation platform of
 - TU Wien, University of Vienna, FH Campus Wien, the FH Technikum Wien
- promotion of cooperation, innovation and interconnected research
- What formats does CTS use?
 - Society – exchange with society and business (8 project teams)
 - Ideas Competition | Reaction Videos | Best Practice | Symposium/Workshop
 - Education – lifelong learning, (continuing) education (3 project teams)
 - CTS Student Awards | Continuing Education & Advice for Non-Academic Partners | Summer/Winter School | Symposium/Workshop
 - Science – research, development, innovation (12 project teams)
 - Start-up funding for research and innovation projects to prepare applications to grant providers | Doctoral School | Think Tank | Symposium/Workshop

Center for Technology and Society (CTS)

Encourage inter-and transdisciplinary cooperation

- What has the CTS already achieved so far?
 - strengthened the cooperation between universities of applied sciences and universities
 - enabled socio-technological research through kickstarters
 - created awareness of the necessity and importance of the interdisciplinary approach to innovation and research
 - first return-on-investments through successful follow-up funding

Action Field “Research and Development of Arts”

- positioning as research university
 - Digital Humanism
- promotion of young researchers
 - measures, goals
- cooperation with Austrian higher education and research institutions
 - measures, goals
- cooperation with business and governmental bodies
 - measures, goals
- increasing international competitiveness
 - measures, goals

Digital Humanism

- Vienna Manifesto on Digital Humanism (<https://dighum.ec.tuwien.ac.at/dighum-manifesto/>)
- bottom-up initiative
- driven by the computer scientists in the research focal area „Information and Communication Technology“
- supported by a growing group of internationally renowned experts
- basic approach: humans must be at the centre of technological developments
- current focus is on the areas of artificial intelligence and machine learning

Action Field „Teaching and Students“

- raising the profile of the study programs
 - Technology for People
- improving study conditions
 - measures, goals
- increasing mobility and internationality
 - measures, goals
- application of innovative teaching and learning methods
 - measures, goals

- the teaching of a sense of responsibility towards society is obligatory in all bachelor curricula to the extent of at least 3 ECTS
- Contents
 - technology assessment
 - technology genesis
 - science ethics
 - gender mainstreaming
 - diversity management
- transfer of knowledge that enables a critical basic understanding of technology and its role and effects in society
- implementation takes place either in at least one compulsory course or in the course of other subject-specific compulsory courses or in the context of a transferable skills course
